Education

Youngstown State University — Youngstown, OH
Bachelor in Computer Science, Minor in Math — *August 2021 – December 2025*

Experience

Dev Youngstown (Software solutions company) — June 2024 – December 2025
Full-Stack Software Engineer — *Remote Youngstown, OH*

- Designed and implemented RESTful APIs (FastAPI) and databases to support MVP applications used by clients for data-driven decision making.
- Built modular, reusable React + TypeScript components (sortable tables, filtering UI, RBAC controls) for an insurance platform, improving maintainability and user experience.
- Introduced structured notification flows with OneSignal, reducing user friction and making engagement patterns predictable.
- Built a React Trivia Game scene featuring component-based UI, game state logic, and user interaction flows, improving the app's engagement and responsiveness.

Youngstown State University — June 2024 – September 2025
Student Software Engineer — *Youngstown, OH*

- Updated and maintained university web pages using HTML, CSS, and JavaScript, focusing on accessibility, responsiveness, and consistency with UX standards.
- Resolved UI issues and content bugs with quick turnaround, collaborating with non-technical clients to understand requirements.

Undergraduate University Research

Youngstown State University — August 2024 – May 2025
Undergraduate D.S. Researcher — *Youngstown, OH*

- Designed and developed a Full-Stack Web Application (React, FastAPI) in an Agile environment, integrating the Ollama AI model Mistral to analyze thousands of customer reviews and guide corporate strategies.
- Partnered with TravelCenters of America to align research findings with business objectives, presenting findings and project updates to technical and non-technical stakeholders.

Projects

Habit Tracker | *FastAPI, React (TypeScript), Cerk, Github* — GitHub Link

- Built full-stack habit tracking app integrating Claude AI to generate personalized coaching based on daily journal entries and mood ratings (1-5 scale).
- Developed a streak tracking algorithm calculating current/longest streaks with proper handling of date gaps and consecutive-day logic.
- Designed RESTful API using FastAPI and SQLAlchemy ORM, achieving end-to-end type safety via TypeScript Pydantic schemas.

Patchy | *React, Python, Discord.py, Oracle Cloud Infrastructure, Ubuntu* — GitHub Link

- Designed and deployed a Discord bot that automatically tracks Riot Games' Valorant patch notes and posts to a designated discord server in real-time.
- Engineered a responsive React + Tailwind landing page featuring onboarding flows, product previews, and Discord OAuth integration.
- Implemented web scraping and change-detection logic to identify new patches and avoid duplicate or redundant notifications.

Technical Skills

Languages: Python, TypeScript/JavaScript, MySQL, HTML/CSS
Frameworks: FastAPI, Flask, Express
Developer Tools: Node.js, Vite, Git/GitHub, VS Code, Xcode, pgAdmin 4
Libraries: React, ReactNative, BeautifulSoup, Selenium, Pandas
